

UK

In order to export dogs/cats to **the United Kingdom** with non-commercial movement, the following lists are required:

1. **Passport** of the exporter, *both original and hardcopy*.
2. The pets have to be at least 7 months old.
3. **Microchip certificate**, *both original and hardcopy*.
 - Primary rabies vaccination is considered only injected after microchip implantation.
 - In case of the same date, a veterinarian must state the time of both microchip implantation and that primary rabies vaccine injection.
4. **Vaccination record/booklet**, *both original and hardcopy*.
 - Each vaccination must include all of the following information: (1) pets' details. (2) date of vaccination and vaccine product information. (3). veterinarians' detail: full name, license number, and signature of a veterinarian who administered the vaccination.
 - The pets must continuously get booster rabies vaccination and the recent one is still valid until the departure date.
5. **Report of the Rabies serology titer test**, *both original and hardcopy*.
 - The report is not less than 3 months from the sampling date to the departure date.
 - Blood sampling must be taken a minimum of 30 days after the primary rabies vaccination.

- The Rabies serology titer result must be at least 0.5 I.U./ml.
- The test must be performed in an EU approved laboratory.
- If the pet is revaccinated within the period of validity of the previous vaccinations, the test does not have to be renewed.
- **UK and EU-Approved laboratories:**
